

Assume a tree where each node can contain three pointers . Enter the values

S W A E C T M L P Y X Q B

How to answer:

1. Insert the values step by step , don't sort the key before start drawing.
2. Draw the tree step by step , the first step will be inserting " S" then "W" then going on.
3. Take the image of the tree, make a pdf of the images when to show.

Note:

1. This is not a quiz and will not be evaluated
2. This type of question may come in exams
3. Practise a problem is better always to understand than hearing and reading lectures.
